

## **Seminar 10**

### **week 10 (30 November 2020 – 4 December 2020)**

- 1. Discussion of the the assignment A7 (IA7 is the last assignment).**
- 2. Discussion/questions about the previous assignments.**
- 3. Discussion about the possible problems for the final practical exam: implementation of synchronization mechanisms (lock, countdownlatch, semaphore, barrier, atomic operations), implementations of new IO operations (buffered writing/reading, writing to a file), implementaion of some communications primitives (send/receive) between threads, adding procedures to the ToyLanguage, etc. Any other sugestions are welcome!**
